2.0 Safety instruction

1. General safety

Safety regulations require that during a repair:

- . Connect the unit to the mains via an isolation transformer.
- . Replace safety components indicated by the symbol
Only by components identical to the original ones.
- Any
Other component substitution (other than original type)
May increase risk of fire or electrical shock hazard.

Safety regulations require that after a repair, you must

Return the unit in its original condition. Pay, in particular,

Attention to the following points:

- . Route the wires/cables correctly, and fix them with the
mounted cable clamps
- . Check the insulation of the mains lead for external
Damage
- . Check the electrical DC resistance between the
mains

Plug and the secondary side:

- 1) Unplug the mains cord, and connect a wire
between
The two pins of the mains plug.
- 2) Set the mains switch the "on" position (keep
the
Mains cord unplug).
- 3) Measure the resistance value between the
mains
plug and the front panel, controls, and chassis
bottom.
- 4) Repair or correct unit when the resistance
measurement is less than 1M Ω
- 5) Verify this, before you return the unit to the
customer/user (ref. UL-standard no. 1492).
- 6) Switch the unit "off", and remove the wire
between
the two pins of the mains plug.

2. Laser safety

This unit employs a laser. Only qualified service personnel

May remove the cover, or attempt to service this device

(due to possible eye injury).

Laser device unit

Type :Semiconductor laser GaAlAs
